Curriculum Vitae

Kunpeng Yi /

Personal Information

Name: Kunpeng Yi

Degree: Ph.D.

Position: Associate Professor, Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences

Education & Appointments

- Associate Researcher / Associate Professor, Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences & Key Laboratory of Urban and Regional Ecology — April 2017 – present
- Postdoctoral Fellow (Ecological Remote Sensing), Institute of Space and Earth Information Innovation, Chinese Academy of Sciences (Aerospace Information Research Institute / former RADI) — August 2014 – April 2017
- Ph.D., Remote Sensing, Hokkaido University — October 2010 – June 2014. Thesis:
- M.Sc., Physical Geography, Northeast Normal University — September 2008 – July 2010
- B.Sc., Geography, Harbin College — September 2003 – July 2007

Research interests

Faculty-page research direction: .

Research addresses global climate change and eco-environmental remote sensing. Typical ecosystems—wetlands, forests and grasslands—in cities, nature reserves and national parks are examined in relation to drought, flood, wildfire and other extreme meteorological hazards. Threatened migratory birds are treated as indicator species for migration mechanisms, flyway-corridor conservation, and responses to human activity and extreme climate events. Applications include Sino BON, restoration of typical degraded wetlands in Northeast China, bird-habitat planning for the Xiong'an New Area, Nanchang territorial spatial planning (2019–2035), and a bird-strike risk early-warning system. Public academic identity is positioned as Movement Ecology × Earth Observation × Biodiversity Conservation.

Professional service

China Grassland Society (council member). Member of the Geographical Society of China, the Ecological Society of China, the Chinese Society of Remote Sensing, and the China Ornithological Society. Guest-in-chief editor of special issues for Remote Sensing, Land and Fire. The RCEES faculty-page awards section is empty.

Hosted NSFC projects (faculty page)

- . NSFC General Programme, 2023.01–2026.12,
- . NSFC General Programme, 2019.01–2022.12,

Projects and output (overview)

Has led more than ten research projects supported by the National Natural Science Foundation of China, a National Key R&D; Programme sub-project, and local commissions, with total hosted funding exceeding RMB 8 million. Has published more than 40 academic papers, holds three invention patents, and has contributed to two monographs. Project-level funding detail is kept in this CV and is not tabulated on the website.

Representative publications

Crossref-confirmed papers in which Kunpeng Yi is a named author. Citation counts are omitted. Two Wildfowl (2020) entries listed on the official laboratory profile are omitted here because no DOI was verified at build time; they appear on the website with that note.
